PHASE 1

PHASE 2

INDUCTION

TRANSFORMATION

---

1 — STRATEGIC DISCOVERY

Gather information by meeting with key stakeholders, performing interviews, and reviewing supporting documents to understand project requirements and define needs and desired outcomes.

The Process

Needs and Desired Outcomes
• Meeting with key stakeholders to obtain a detailed description and scope of each project
• Perform interviews and reviews of supporting documents
• Understand the status of the Program Implementation

---

2 — EVALUATION & DEFINITION

To effectively manage a project or program, you must identify evaluation criteria, stakeholders, goals, and reporting requirements. Identify critical elements and KPI options. Develop a project management strategy, analyze outcomes, and establish a change management strategy and performance measurement strategy.

The Process

• Identify Evaluations Criteria
• Identify stakeholders, roles and responsibilities, desired goals, and reporting requirements
• Identify critical elements associated with the program
• List possible KPI options
• Identify Project Management Strategy
• Analyze possible outcomes of Project Management Strategy
• Identify Change Management Strategy
• Performance Measurement Strategy

---

3 — ANALYSIS & VISUALIZATION

During this phase, the team outlines various data analysis and reporting tasks, including data alignment, analysis, reporting tool development, visualization, benchmarking, final development, and customization of Actionable Visibility Boards™ (AVB).

The Process

Viable Options
• Alignment
• Perform Data Analysis
• Develop Reporting Tool
• Visualization Models
• Advantages and Disadvantages
• Benchmark
• Develop Final
• Customized Actionable Visibility Board (AVB)

---

4 — SELECTION & STANDARDIZATION

Now, narrowing down to the best action paths becomes evident. Through standardized reporting methods and real-time analysis, comparing the alternatives shows the preferred executable options.

The Process

• Comparison Summary
• Preferred Option
• Standardized reporting methods
• Enables real-time analysis

---

5 — IMPLEMENTATION & MONITORING

We can provide governance and oversight, implementation, and capacity building as part of this process. To ensure accurate and timely reporting, we conduct monthly interviews to gather project data and verify and analyze the data to provide precise monthly updates to stakeholders.

The Process

Managing the Investment
• Governance and Oversight
• Implementation and Capacity
• Monthly interviews to gather project data
• Validate and analyze data to provide an accurate update to the AVBs
• Deliver monthly AVBs

---

6 — IMPROVING & EVOLVING

Our services help organizations achieve program visibility to stakeholders, optimize effective communication, improve coordination efforts, increase understanding of projects among executives and engineers, accelerate and improve decision-making, and improve overall reporting activities.

The Process

• Provides program visibility to stakeholders
• Optimize an effective communication
• Improves coordination efforts
• Increases understanding of the projects among the executives and engineers
• Accelerate and improves decision making
• Improves overall reporting activities
